student success

nothing less

As a national leader in teacher development and a long-time partner to the Boston Public Schools, we're investing everything we have learned into building a preK-12 pathway that prepares all students for success.

BPE Teaching Academies provide ambitious instruction to every child, while serving as a training ground for the next generation of great teachers and a model of effective practice for the city as a whole. We built Dudley Street Neighborhood Charter School (grades preK-5) from the ground up and are transforming the Dearborn STEM Academy (grades 6-12) into a state of the art school that prepares students for the challenges of college and career. Together, our Teaching Academies provide a preK-12 pathway for children in the Dudley neighborhood of Roxbury, harnessing the expertise of highly skilled educators, teachers in training, volunteers and community partners to ensure that all children get the instruction they need.

Boston Teacher Residency recruits a diverse set of talented individuals and provides them with the hands-on experience, practical tools, and ongoing support they need to become effective teachers for Boston students. The innovative model combines a full year classroom apprenticeship with rigorous master's level coursework. Residents work side by side with experienced colleagues in BPE's Teaching Academies as they master research-based practices, analyze their impact on student learning, and refine instruction until every child succeeds.

Dudley Promise Corps engages committed, community-oriented adults in meaningful service in BPE's Teaching Academies. Corps members offer individualized academic support to students and build student and community engagement school-wide. Through their year of service, Promise Corps members work alongside teachers, while gaining valuable training that opens the door to rewarding careers in education.

BTR and DPC are proud to be AmeriCorps service programs.
